

Antiseptic Skincare

Topical Allergy Management & Itchy Skin

Winner of PATS Petcare Product 2015, Leucillin is an incredibly versatile easy to use solution, specially formulated for the health and skincare of animals. Leucillin is a new approach to animal healthcare, giving animal owners and petcare professionals an infection control solution that just works!

Atopy is an allergic skin disease due to environmental allergens for example dust mites, fleas, molds and pollens. Dogs may also have food allergies or intolerances to certain ingredients.

Dogs who suffer allergic reactions often show it through skin condition. Pruritus (itching) is the hallmark sign of allergies and is often exhibited through the many symptoms: licking or chewing on feet, rubbing their faces, scratching their sides and belly and recurrent ear infections. The skin itself may get dry and crusty, reddened, or oily and it is very common to get secondary bacterial infections and sores, which usually are the result of self-mutilation through chewing and scratching.

Soothing and Calming the Skin with Leucillin

It is important to keep in mind, Atopy can be managed but not cured, is vital that veterinary and nutritional advice is sort and the dog is receiving nutritionally what it requires to support its immune system from the inside out.

Leucillin supports the skin from the outside in, its soothing formula helps calm the symptoms of allergy sufferers and works as a preventative against secondary infection.

Mirroring and supporting the body's immune system, Leucillin replicates the leukocytes (white blood cells) naturally produced chemical used to fight infection caused by invading pathogens (germs). Leucillin is a natural antiseptic, destroying harmful germs on contact allowing the skin to heal naturally.

Leucillin provides you with a safe, skin pH neutral, non-toxic, non-irritant solution for use on all skin types. Leucillin is reliable skincare with excellent results, out-performing other products with its incredible **Log7¹⁰ 99.99999%** results. Leucillin kills germs that can cause infection, irritation, dry, itchy, flaky or smelly problematic skin, associated with allergies and provides you with a powerful solution to combat all types of infection.

Leucillin, helping to maintain healthy itch free skin keeping pets healthy happy from the outside in.

**“ pH neutral, non-toxic,
100% safe to ears,
eyes, sensitive or
allergy prone skin ”**

Topical Antiseptic Skincare That Just Works

Leucillin is a new approach to animal healthcare, giving animal owners and petcare professionals an infection control solution that just works.

Leucillin is a versatile easy to use solution suitable for use on all.

Leucillin's soothing and calming formula helps manage the symptoms of allergy sufferers and prevents infection, but what makes it different?

Review taken from Viovet My Bishon Frise has regular itchy skin. She also has irritable feet, I first used Leucillin when she was sprayed for healthy wound healing. Its was magic! Leucillin to me is a miracle product, my dog gets comfort and relief from its application anywhere on her body. **Brett Harris**

Keeping Skin pH Neutral Happy

Leucillin is skin pH neutral, this is far more than a “buzz phrase” but imperative to making sure the skin remains healthy, the health of the body and skin is directly linked to maintaining the right balance between acidity and alkalinity.

pH stands for "potential hydrogen" and is used to describe the acid-alkaline ratio of a substance, which ranges from 0 (the most acidic) to 14 (the most alkaline).

The skin is the body's largest organ and acts as its first and largest line of defense. The skin's barrier, is responsible for blocking germs, pollution, toxins, and harmful pathogens (bacterial, viral and fungal), protecting and maintaining the skin's

health is vital to the overall well being your animal, when a product is too alkaline or too acid this can cause detriment to the living tissue to the point of being red, inflamed and painful to touch which can cause elongated recovery and stress to the animal.

Leucillin is manufactured to be skin pH neutral, this insures that its powerful antiseptic properties work in harmony with the skin at a pH level which is a perfect natural environment for maintaining good skin health.

How to use Leucillin

To alleviate the symptoms of allergy sufferers, liberally spray the affected areas to soothe and calm the external conditions, refer to your veterinarian to address the allergy cause if not immediately apparent. For all demalogical conditions liberally spray the affected areas when conditions flare up, repeat applications at least three times daily.

In summary, what you need to know about pH is:

- Extreme pH levels harm skin and cause inflammation, irritation, and dryness.
- Repeated use of products that are not pH-balanced can create chronic problems to skin.

Dog, Skin Condition

My bulldog suffers from a skin condition, we don't quite now what it is, we have tried many creams, sprays and shampoos from the vet. Nothing seemed to fully clear it up. We then found Leucillin, we have been using it now for 3-4 weeks and the result is amazing, the patches on his skin have dried up and the fur is starting to grown back. **Emma Linley**
