

Infection Control

how do I use Leucillin?

Leucillin is skin pH neutral, non-toxic and will not sting. It is 100% safe to use in any application including eyes, ears, sensitive skin and allergy prone skin, simply spray liberally to use, recommended for use 2/3 times daily, allow to dry naturally.

To alleviate the symptoms of allergy sufferers, liberally spray the affected areas to soothe and calm the external conditions

Available in four sizes

testimonials and endorsements

Professional Endorsement - Lucinda Green MBE

"What I have found magic about Leucillin is that whenever you are not quite sure what to do or put on, I just give a squirt of Leucillin - if it's a weepy eye, a smelly foot, a cut, a graze, a bite or some odd skin infection, they all have the same treatment. I find it so useful that I even carry a small, bottle in my handbag"

Fast Acting Formula

"Rex was found abandoned with a huge wound. The paw of the foot was cut in two, infected and filled with maggots. It took two surgeries, amputation of a toe and a lot of care. I struggled for almost 2 months to heal the wound, I then received Leucillin and the miracle happened ... in less than 10 days the infection gone, the wound closed, Rex is now a happy dog!! Very easy...very quickly!!!!"

Soothing & Calming Allergies - Bulldog

"My bulldog suffers from a skin condition, we don't quite know what it is, we have tried many creams, sprays and shampoos from the vet. Nothing seemed to fully clear it up. We then found Leucillin, we have been using it now for 3-4 weeks and the result is amazing, the patches on his skin have dried up and the fur is starting to grow back."

Emma Linley

Dee & Willow

Safe, Effective Care for Eyes

My cat Willow spent a year in and out of specialists until finally diagnosed with Uveitis. We tried many medications, creams, gels. It was a ritual of laborious, stressful and expensive treatment until I was introduced to Leucillin. I have been using one single drop only in Willow's eye and Leucillin just works! It stops the full flare up fully happening! I was amazed it managed to help Willow's problems through what seemed so uncomfortable for her! Flare-ups are now fewer and Willow is much happier.

no steroids antibiotics or alcohols

what does Leucillin do?

It kills germs instantly by destroying the bacteria on contact. No surviving bacteria means no resistance to skin recovery, demonstrating rapidly reduced recovery time.

competition safe

Leucillin "tests free" for all competition animals. For equines, Leucillin contains no substances prohibited under the FEI or Jockey Club banned chemicals for competition.
